

# Coded-Compatible Transceivers

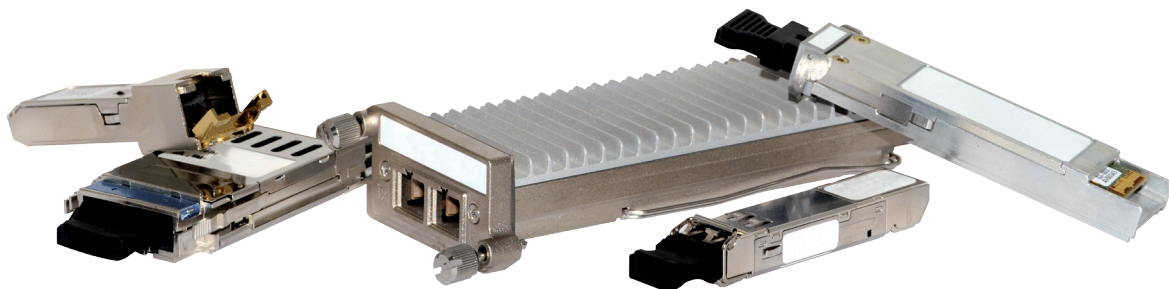

High-End Quality which meets your budget

**50-80% Cost Reduction compared to branded transceivers!**  
**We guaranty that our transceivers are 100% compatible.**

- » Many transceiver models on stock for fast delivery
- » Transceivers are coded to be 100% compatible
- » Our transceivers are certified by
  - Brocade Communication Systems Inc. and
  - QLogic Corporation
- » We provide 100% guaranty for interoperability
- » Conformity with MSA- and Green IT Standards

## Coded-Compatible Transceivers for almost every Brand

### Background: How it works?

Only a few Brands are actually manufacturing their "own" transceiver hardware. In the very most cases transceivers are manufactured for the big brands (OEM) by specialised hardware companies. The internal memory chip (EEPROM) of the transceiver only carries brand-specific

information. This code is checked by the network router/switch in a way that only brand-matching codes are allowed by the brand to boot up and run a transceiver.

Pan Dacom offers Coded-Compatible transceivers which are providing the

same quality and the same performance as branded transceivers. However they come with a 50-80% lower price.

Using our Coded-Compatible Transceiver does not affect the warranty of your network equipment e.g switches, routers, etc.

## We are supplying Coded-Compatible Transceiver for the following Brands:

- » ADVA Optical Networking SE
  - » Alcatel Lucent S.A.
  - » Arista Networks Inc.
  - » AVAYA Networks Inc.
  - » Ciena (ex Nortel)
  - » Cisco Systems Inc.
  - » D-Link Inc.
  - » Enterasys Networks Inc.
  - » Extreme Networks
  - » Brocade LAN (ex Foundry Networks)
  - » Hewlett-Packard Company
  - » Hirschmann GmbH
  - » HP/3Com Corporation
  - » HUAWAI Technologies Co. Ltd.
  - » Juniper Networks Inc.
  - » Linksys by Cisco Systems Inc.
  - » Mellanox Technologies, Inc.
  - » Nokia Solutions and Networks
  - » Nortel Networks Corporation
  - » Keymile GmbH
  - » Infinera (ex Transmode Systems)
  - » Brocade SAN Systems
- ... further brands available on request

Besides Coded-Compatible Transceivers we are also offering certified Transceivers as well as special Transceiver for e.g. bi-directional or storage (NAS/SAN) applications.
