

OPTIMAL CONNECTIVITY and DEV Systemtechnik partner to support markets in Middle East and North-East Africa

DEV Systemtechnik GmbH and OPTIMAL CONNECTIVITY LLC enter a partnership agreement to support customers in MENA markets.

Friedberg, Germany. Dubai, UAE – March 24nd, 2021

DEV Systemtechnik will complement the product portfolio of OPTIMAL CONNECTIVITY with RF-over-fiber transmission systems, RF signal distribution and combining system as well as switching and matrix systems.

In combination with OPTIMAL CONNECTIVITY's own extensive RF and Fiberoptic product portfolio, customers benefit from an unparalleled offering including solution design, implementation, testing and services for wide spectrum of RF-related applications. OPTIMAL CONNECTIVITY supports standard as well as fully customized RF projects for teleports, satellite ground station, governmental and further projects in the region.

“We are very excited to have OPTIMAL CONNECTIVITY as a partner specialized to address the demand form the emerging MENA markets. OPTIMAL CONNECTIVITY has a long-standing reputation as a high-quality RF solution provider for manifold applications” says Manfred Mettendorff, Managing Director of DEV Systemtechnik, “Together with DEV's product portfolio customers hugely benefit from a true one-stop-shop with in-depth service and support infrastructure available right at their door-steps.”

“We are looking forward to cooperate with DEV Systemtechnik. DEV with its R&D and production in Germany has an excellent track record when it comes to quality, service, and cost efficiency. DEV's products are mainly deployed to Broadcast and Communication market because of their exceptional product quality and long product life they play mission critical roles in daily operation. The portfolio perfectly complements our own range of RF and Fiberoptic solutions” says Dr. Michael Gnoth, the Managing Partner of OPTIMAL CONNECTIVITY, “We are convinced that our cooperation with DEV we are able to serve our clients with comprehensive turnkey solutions.”

PRESS RELEASE

About DEV Systemtechnik: DEV Systemtechnik is a member of the AXING Group, develops and manufactures a wide range of products and systems for optical and electrical transmission of radio frequency (RF) and broadband signals via coaxial cable or fiber. For over 20 years DEV has designed, engineered, and manufactured RF transmission equipment for satellite, broadcast, and cable applications. DEV systems are deployed in the signal chain of major satellite networks worldwide.

About OPTIMAL CONNECTIVITY LLC: OPTIMAL CONNECTIVITY LLC is a Emirati-German owned company based in Dubai U.A.E. The focus of OPTIMAL CONNECTIVITY is to provide customized and standard solutions, products and services to projects mainly in IT communication, oil & gas, railway and industrial markets. Operating as system integrator OPTIMAL CONNECTIVITY has established an ecosystem of like-minded professional suppliers, service partners and clients with whom we are addressing even the most complex spectrum of requirements.
